The main drawing is a detailed technical plan of the Ostumfahrung Altstätten project. It shows a proposed road layout (orange and yellow) that bypasses the town of Altstätten to the east. The road starts near the intersection of the main road and the railway, then curves around the town, passing through several residential areas. Key features include: a roundabout at the intersection of the main road and the railway; a bridge over the railway tracks; a bridge over the SBB tracks; and a bridge over the main road. The drawing also shows existing buildings, streets, and infrastructure. Various annotations are present, including elevation points, slope percentages, and construction details. A north arrow is located in the upper left quadrant. A scale bar is located in the upper right quadrant. The drawing is divided into several sections by dashed lines, indicating different parts of the project.
